The restriction requirement presented in the last office action contained an error in the listing of the claims for each group. Groups I through VIII should list claims 1, 3 and 4 (in part) for each group. Groups IX through XVI should list claim 2 (in part) for each group.

Applicant's election with traverse of Group II in the response filed July 30, 2003 is acknowledged. The traversal is on the ground(s) that the classification of Group X is identical to that of Group II, therefore the search proposed for this Group would not impose any additional search burden. This is not found persuasive because Groups II and X prepare different compounds and involve different reactants therefore different computer searches would need to be done for each group. This would impose a serious burden on the examiner and the patent office resources. The restriction requirement with respect to the election of a specific enzyme or microorganism is withdrawn.

The requirement is still deemed proper and is therefore made FINAL.

Claim 2 stands withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the response filed July 30, 2003.

Art Unit: 1626

Claims 1, 3 and 4 are objected to because of the following informalities: the claims contain non-elected subject matter. Appropriate correction is required.
